

Revolt!

The Next Great Transformation from
Kleptocracy Capitalism to Libertarian Socialism
Through Counter Ideology, Societal Education, &
Direct Action

By John Asimakopoulos, Ph.D.
City University of New York
ISBN: 978-0-9832982-0-5

Championing counter-ideology, societal education, and direct action professor Asimakopoulos develops a theory-to-action model for working-class movement-building toward societies based on self-organization and self-direction. *Revolt!* begins with an analysis of the 2008 economic collapse showing how neoliberal globalization is intensifying capitalism's contradictions resulting in perpetual crises affecting workers. By looking at the labor and civil rights movements it then demonstrates meaningful working-class gains were obtained through high levels of class conflict made possible by radical leaders and ideology, class-consciousness and solidarity through societal education, and even rebellion. Now, argues professor Asimakopoulos, social justice can only be achieved through a new movement which, short of the immediate overthrow of capitalism, can obtain with direct action specific working-class victories that will set in motion evolutionary radical change. One strategic proposal is demanding corporate boards of directors only include community and labor representatives.

Revolt! will be of most interest to workers, activists, college students, and scholars, as well as anyone interested in the practical side of radical anarchism, Marxism, and social movements.

COMING THIS SUMMER!
